

MASTERS ROADMAP SUCCESS PATH

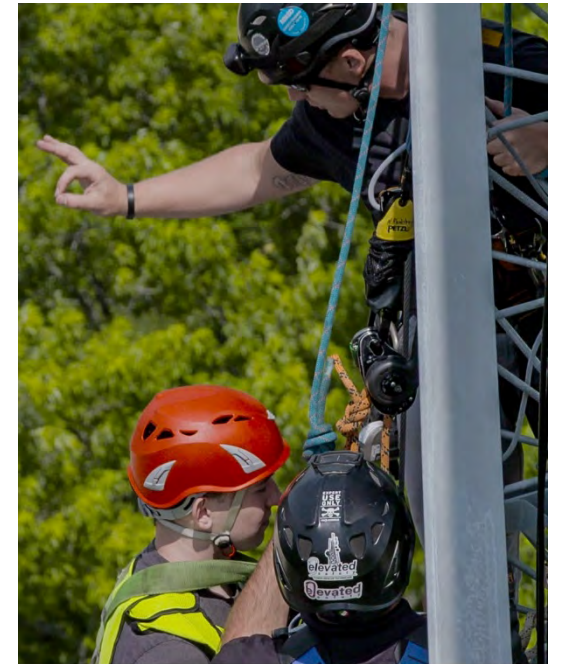

CORNERSTONE

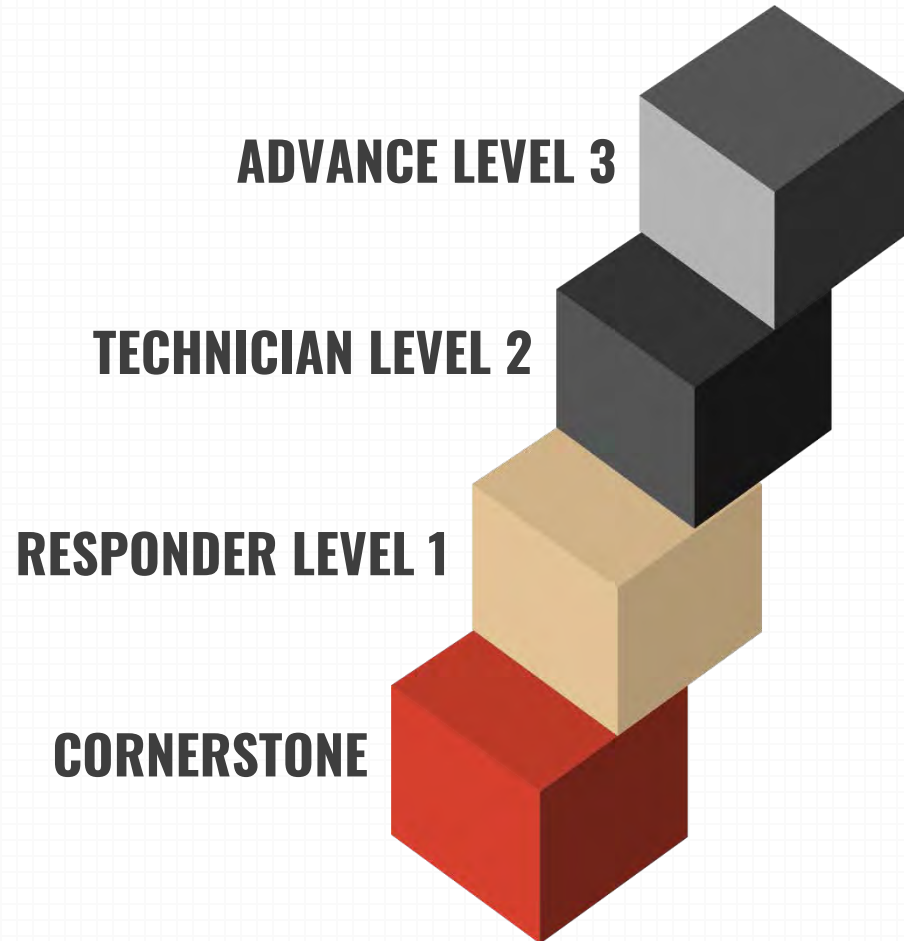

RESPONDER LEVEL 1

TECHNICIAN LEVEL 2

ADVANCE LEVEL 3

The Master's Roadmap Success Path starts with Cornerstones

The **Cornerstone** is the first stone set in the construction of a foundation, important since all other stones will be set in reference to this stone, thus determining the position of the entire structure.

In architecture, this stone is considered sacred. The Cornerstone is the prominent location of the structure. It sits with an inscription on the stone indicating the use, architect or story of the building and thus the stone.

MASTERS ROADMAP SUCCESS PATH

ADVANCE LEVEL 3

It's all about strength, balance, and endurance, always moving through and between Cornerstone, Responder Level 1, and Technician Level 2. Push your rope handling skill-sets way beyond your expectations. Take your rigging knowledge and understanding to new levels.

TECHNICIAN LEVEL 2

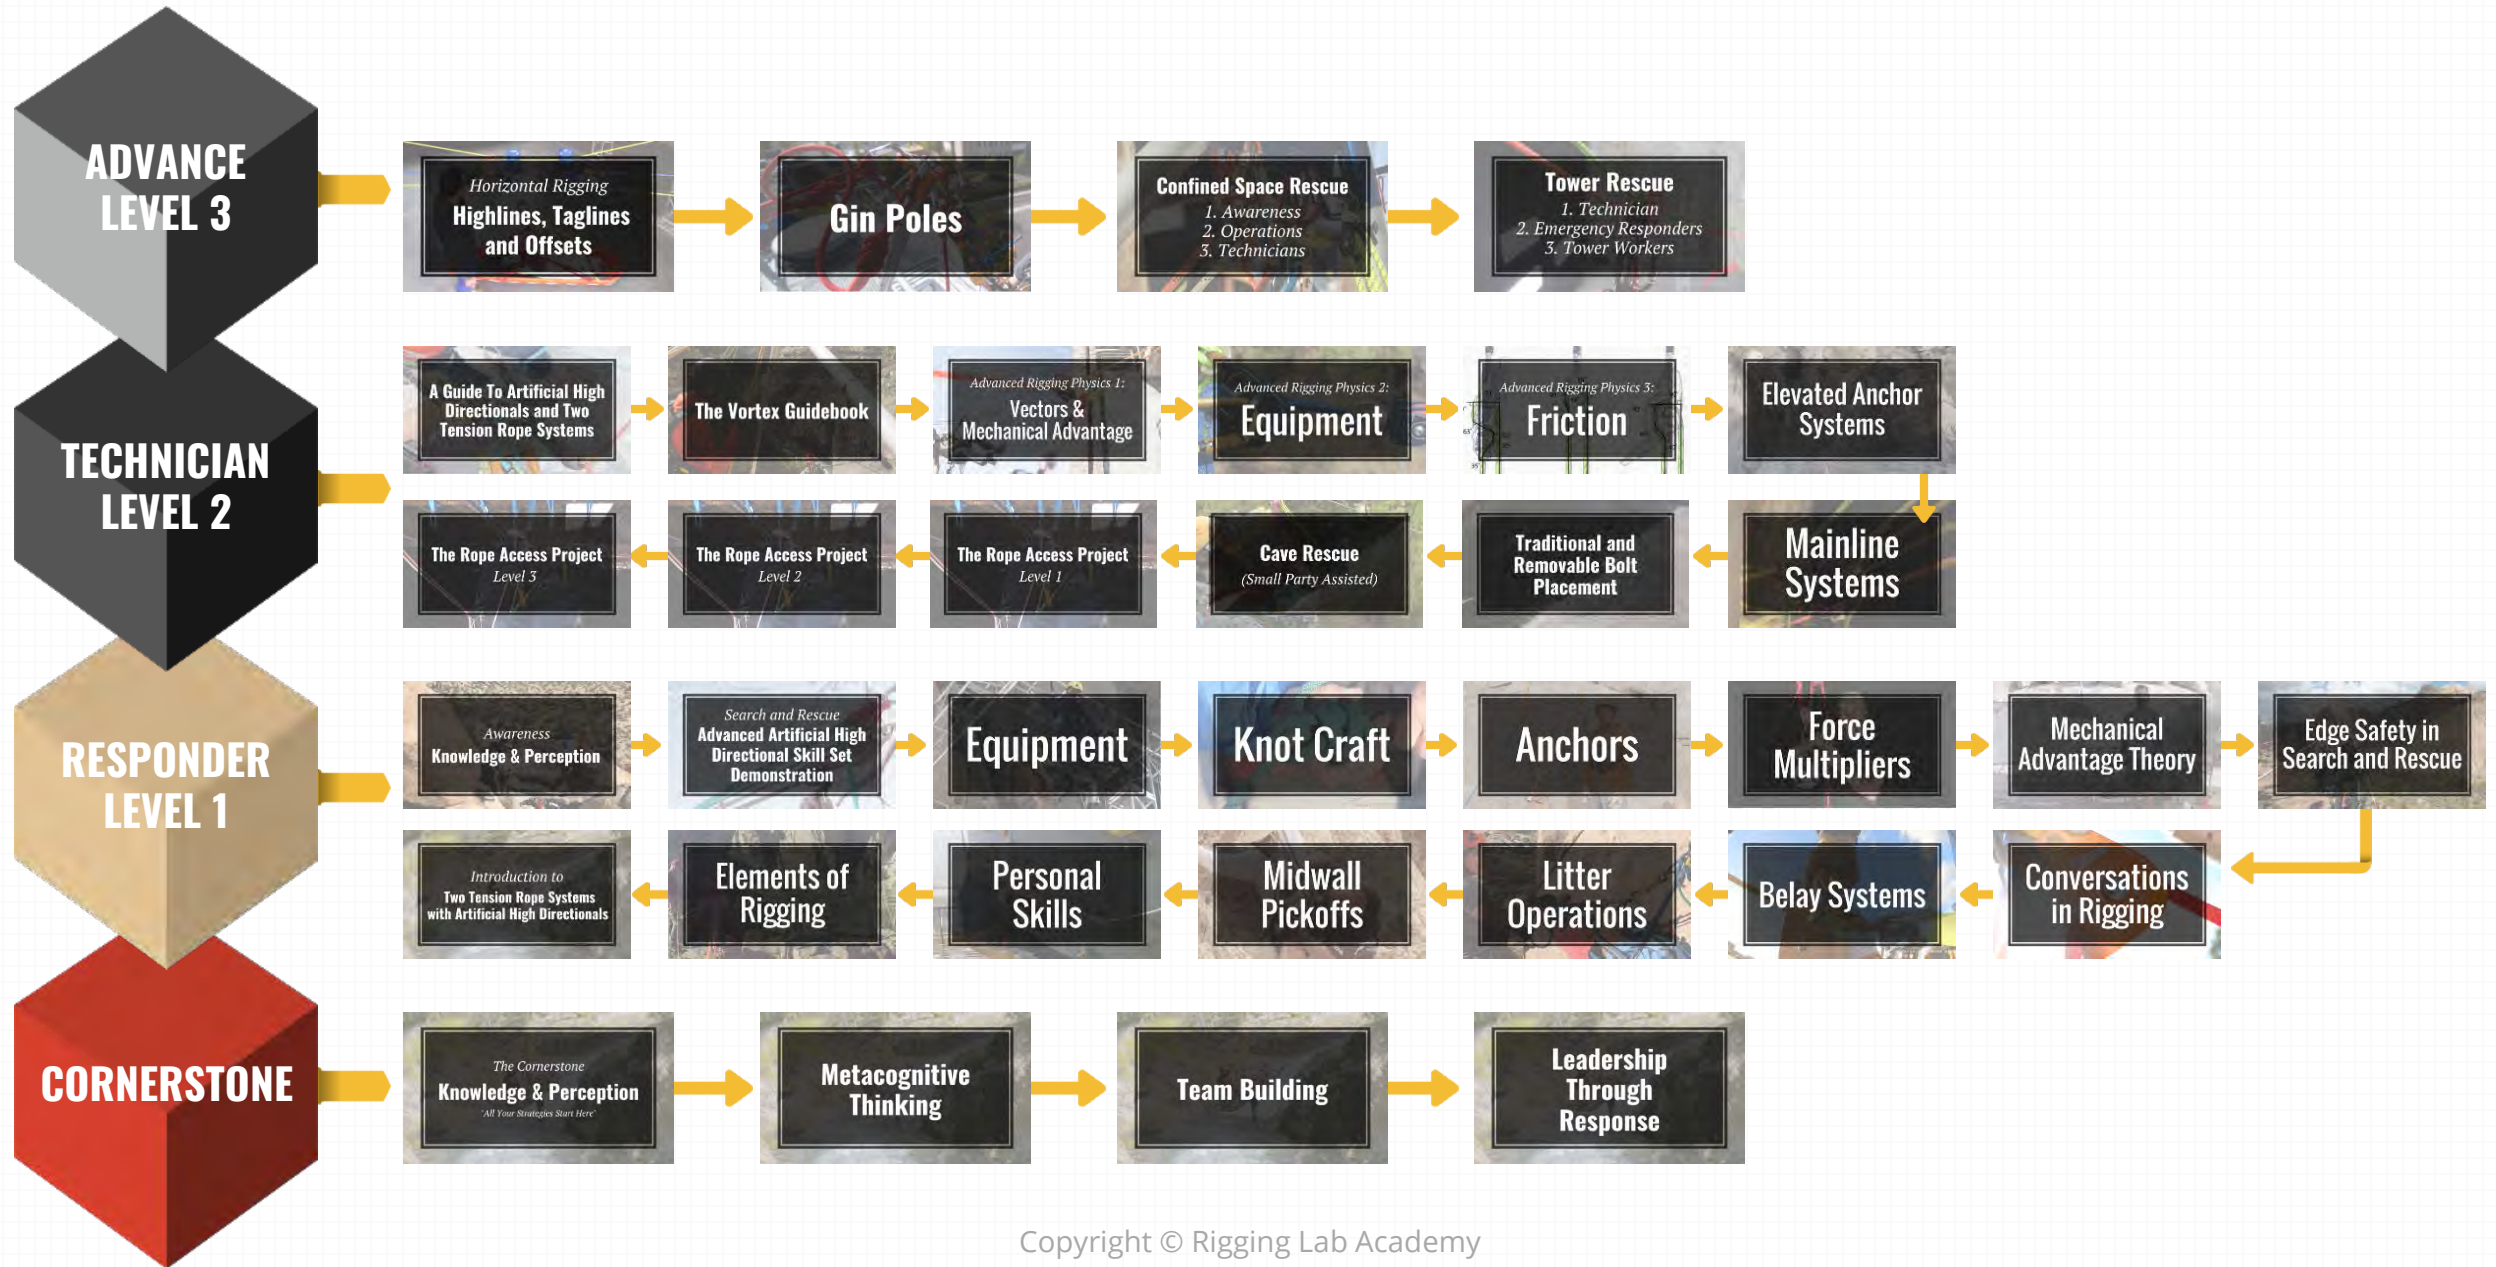

The Technician Level 2 is one proficient in specific skills, techniques and has a practical understanding of the principles. Providing various solutions for rope based rescue situations in the urban and industrial environments into everyday operations as it relates to rescue and rigging.

RESPONDER LEVEL 1

The process of being functionally successful within a group. Understanding that nothing ever happens without community, Responder Level 1 becomes of pivotal importance because it is through the team and or group that objectives are accomplished.

CORNERSTONE

Believing, knowing, thinking and understanding all have gradients. The goal of "thinking beyond our thoughts" or metacognitive strategies is to help us become comfortable with developing strategy.

CORNERSTONE

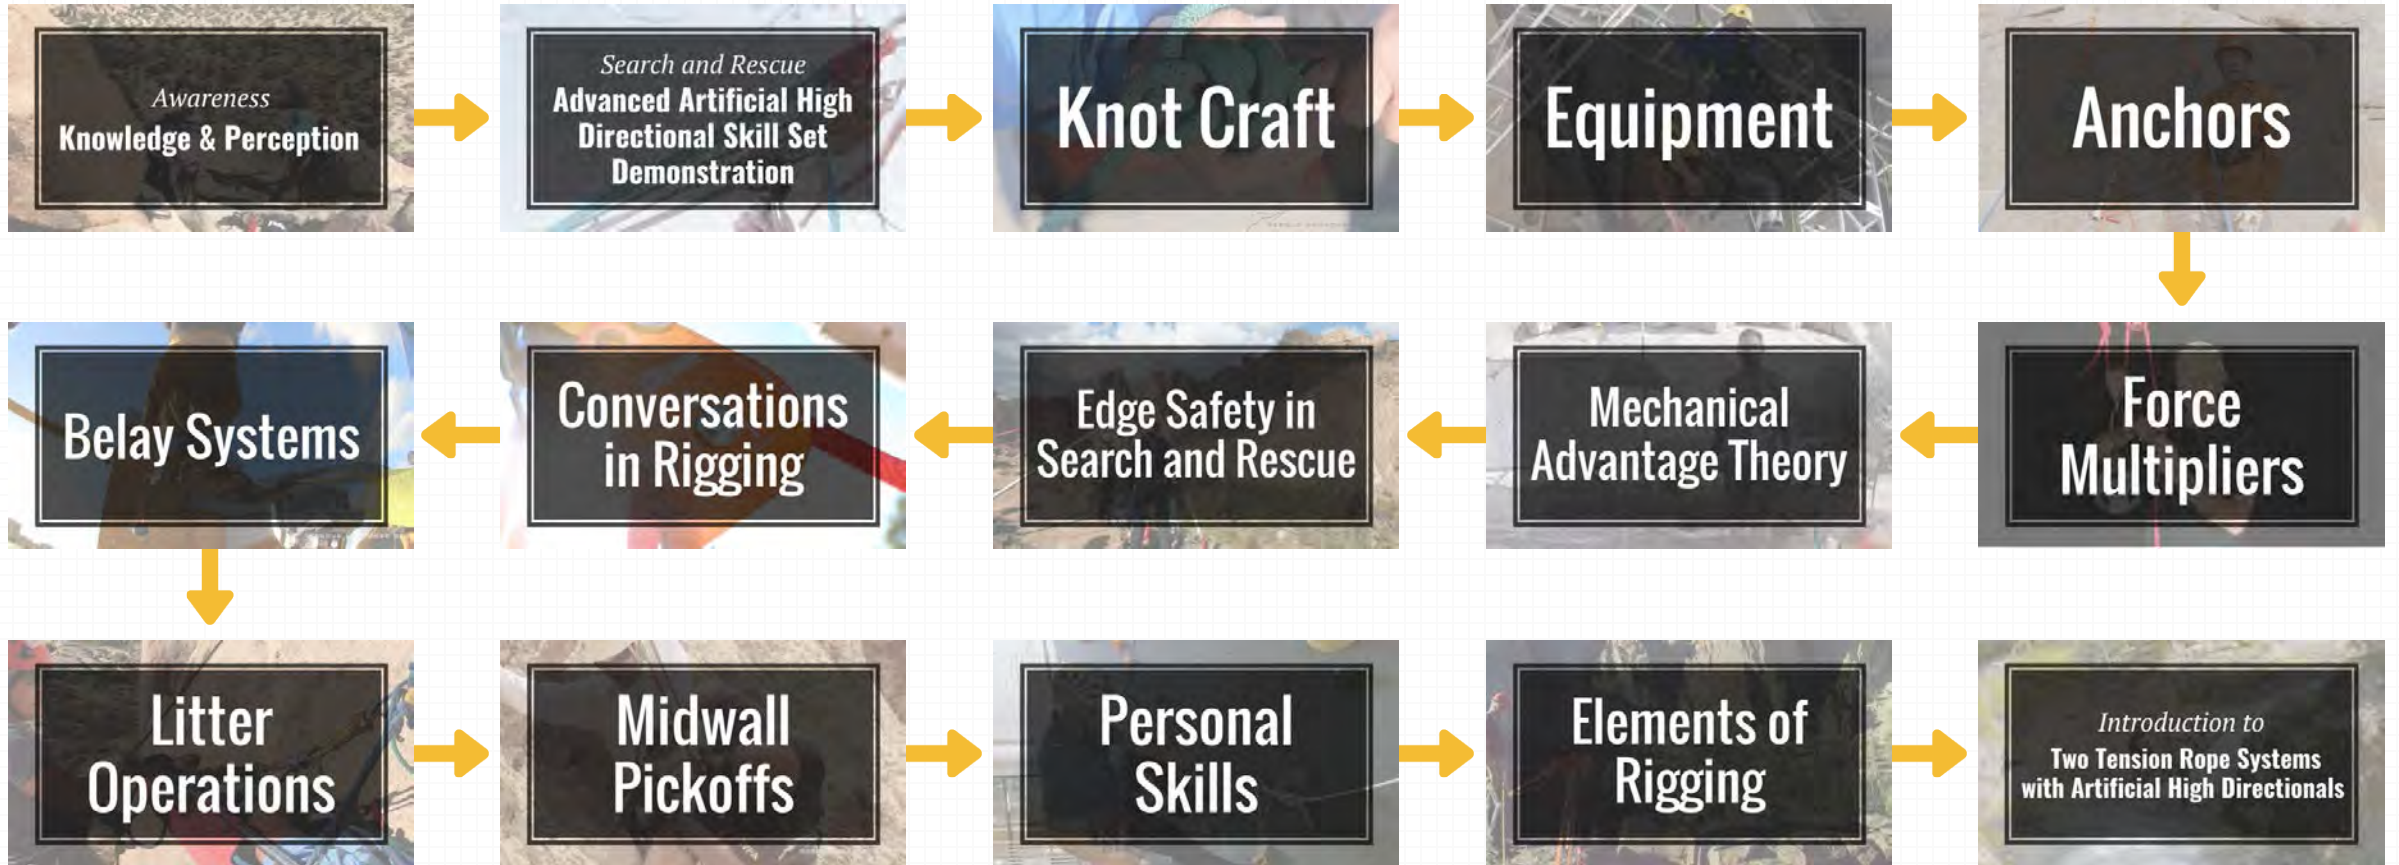

Staying with a roadmap will progress you toward where you need to be, a master of your skills. On track and in the thick of techniques and methods that saves time, energy and ultimately... Lives.

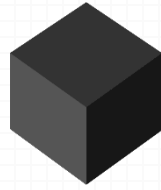

As the Cornerstone sets the direction, the Foundations serve to set the strength. Foundation courses are designed to interlace with each other. They aren't meant to be stacked straight up but to pull from each other, building strength, maintaining balance, and increasing endurance.

RESPONDER LEVEL 1

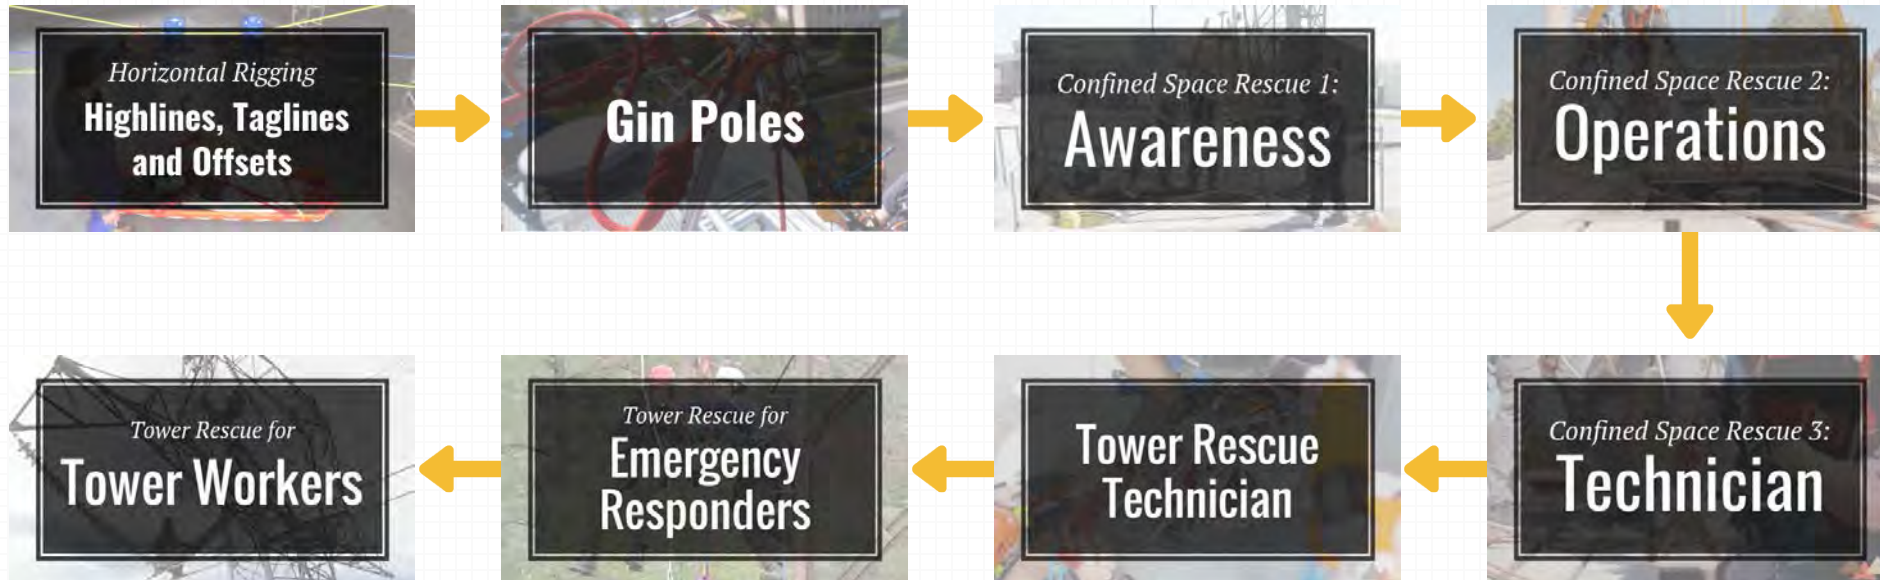

TECHNICIAN LEVEL 2

ADVANCE LEVEL 3

CONTINUE TO CLIMB

Congratulations on completing the Master's Roadmap. Now that you have finished, continue to advance your skills and knowledge with the wide breadth of courses within Rigging Lab Academy.
